COURSE NAME: AMAZON WEB SERVER

TASK 1- MULTI-FACTOR AUTHENTICATION (IAM)

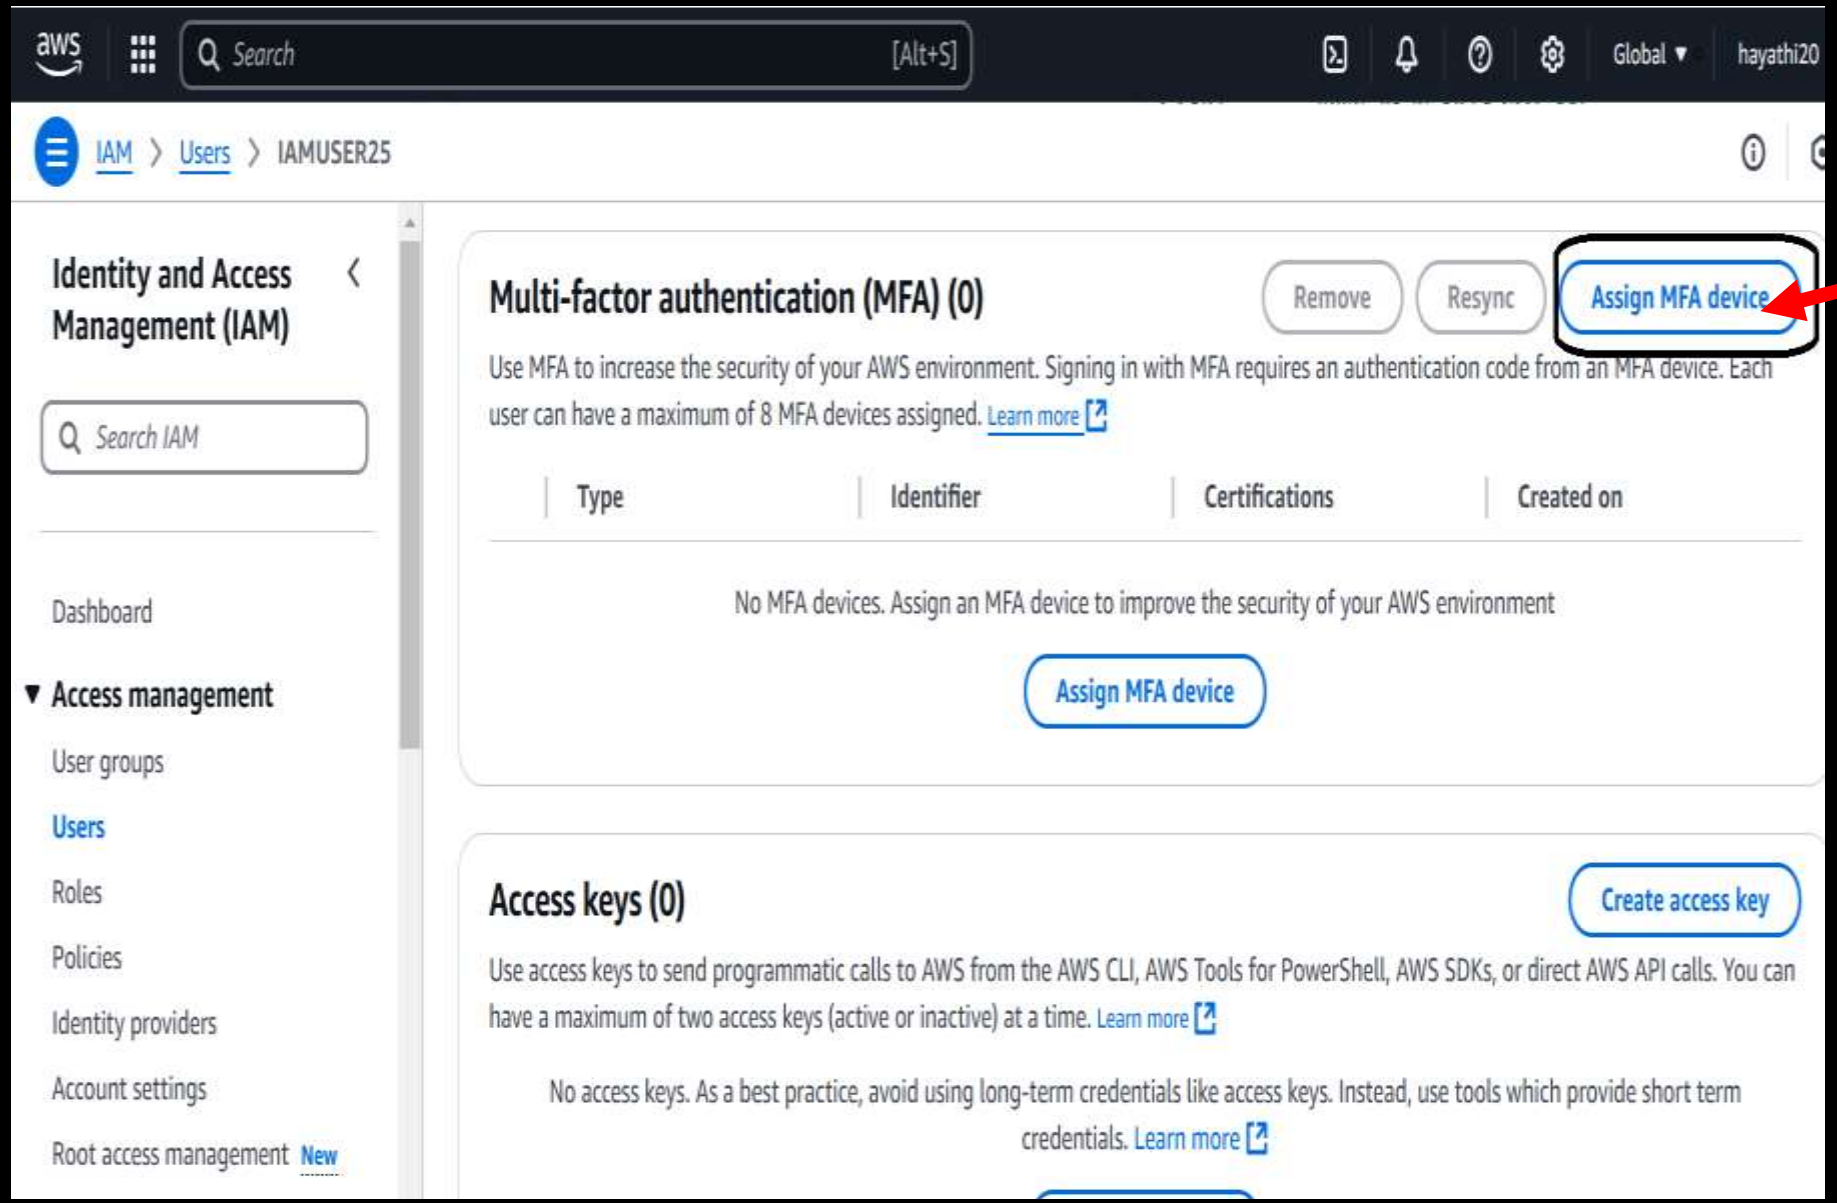

Course Trainer: Prabhanjan

Student Name: Noor Hayathi

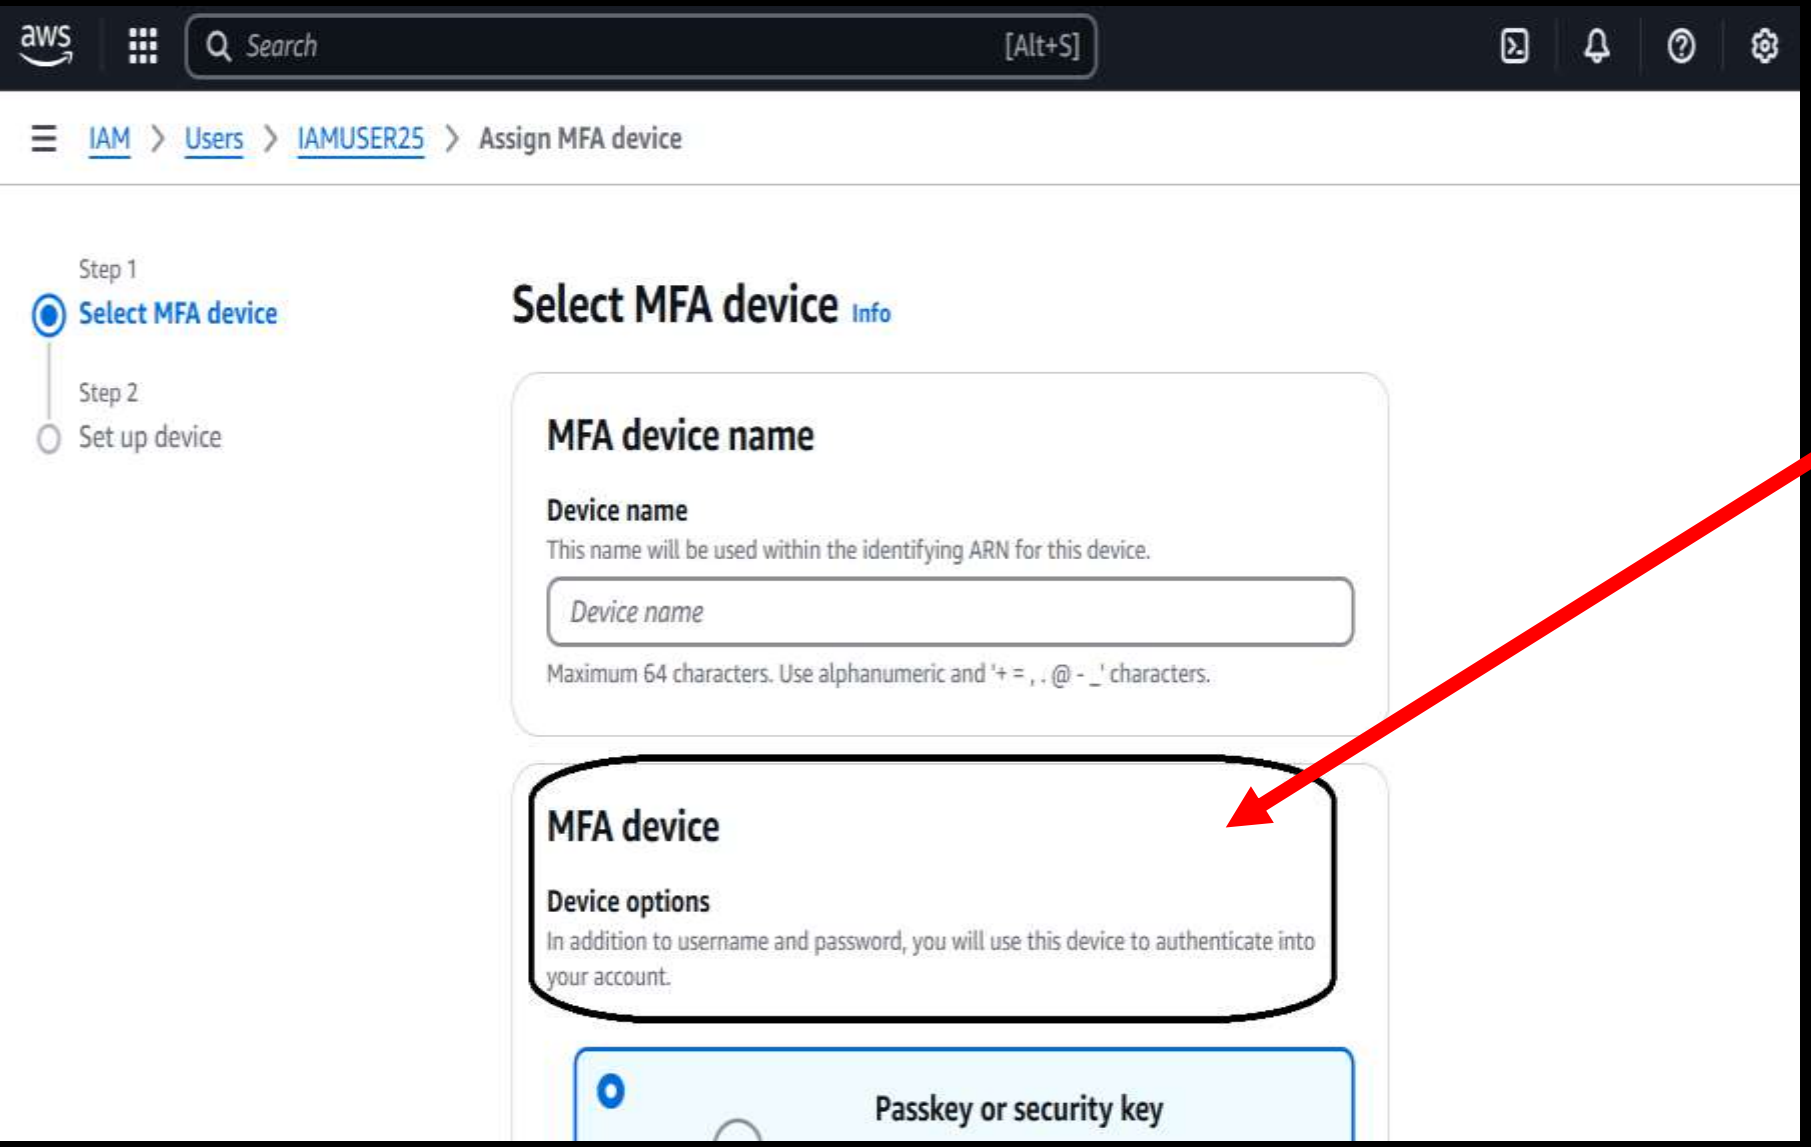

Step 1: Create IAM user account

Step 2: Click on users-> security credentials

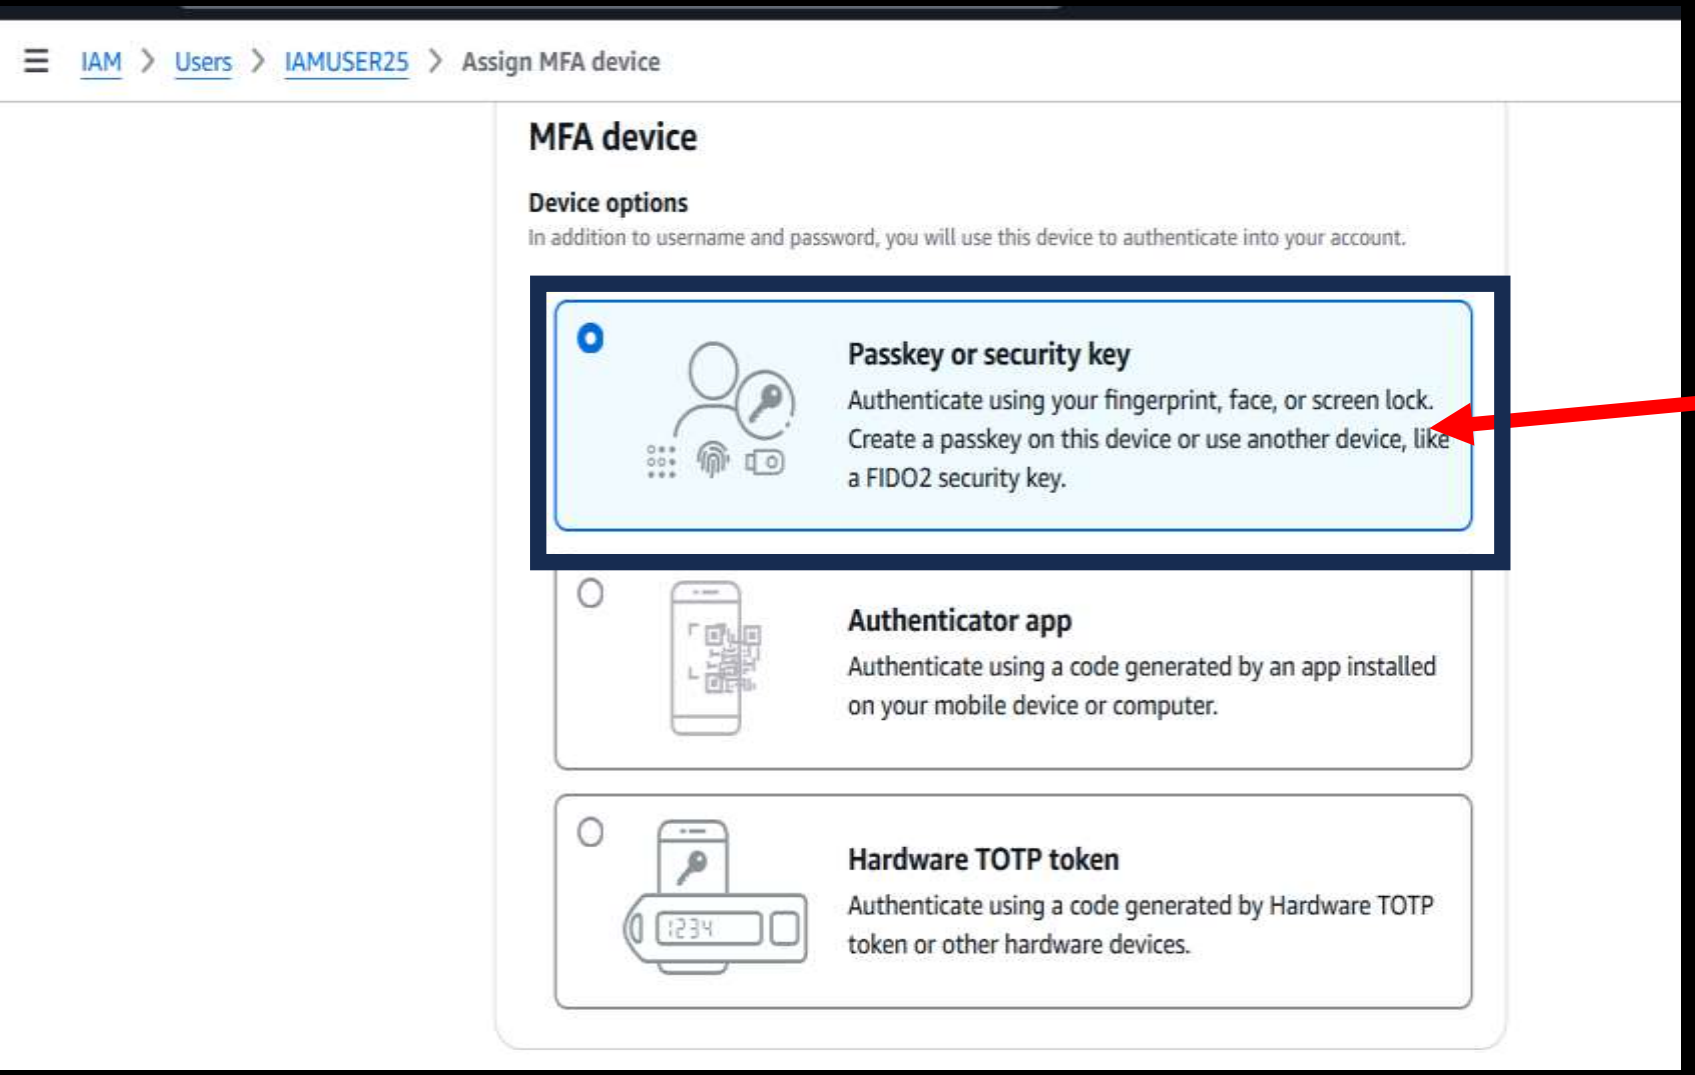

Step 3: Select Assign MFA device to enhance security verification to the IAM user account.

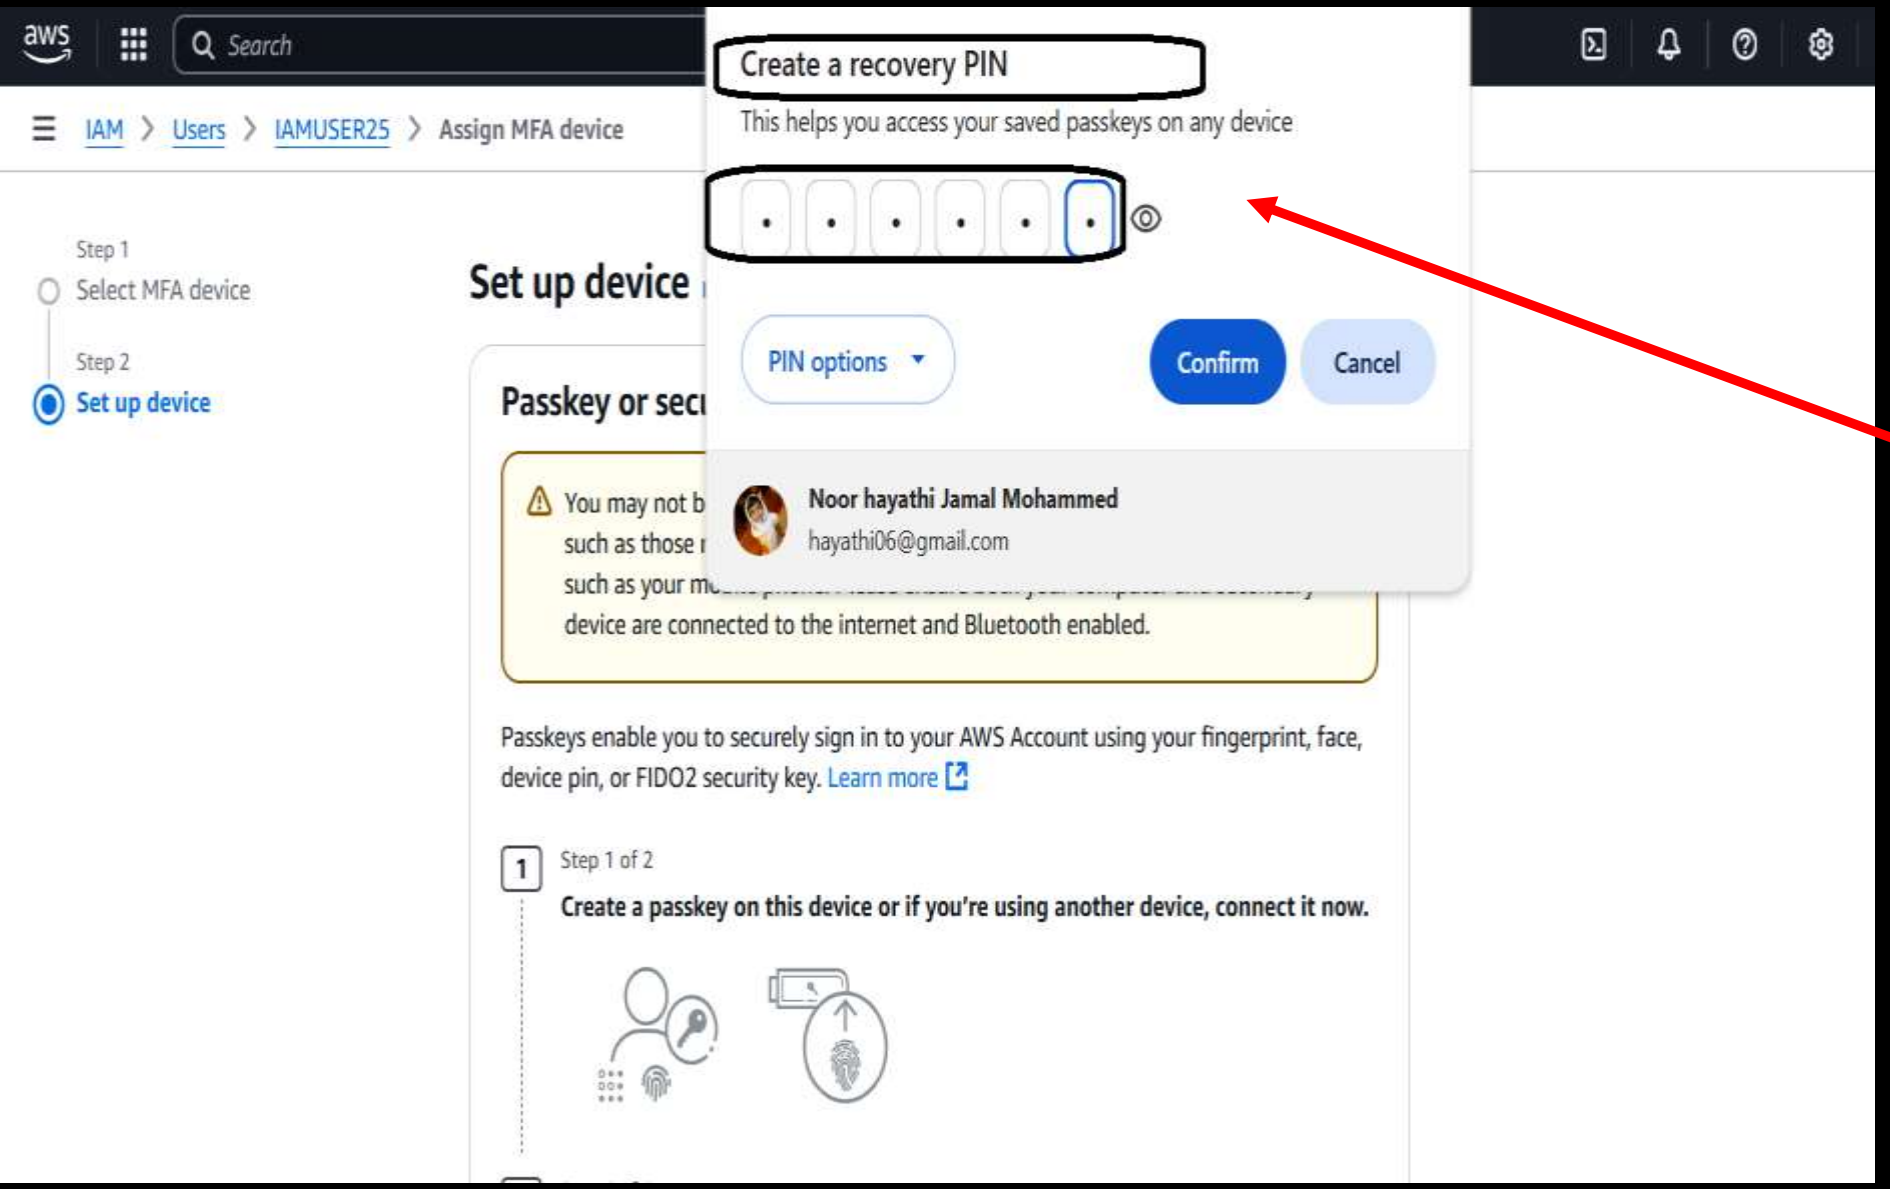

Step 4: Click on MFA device options.

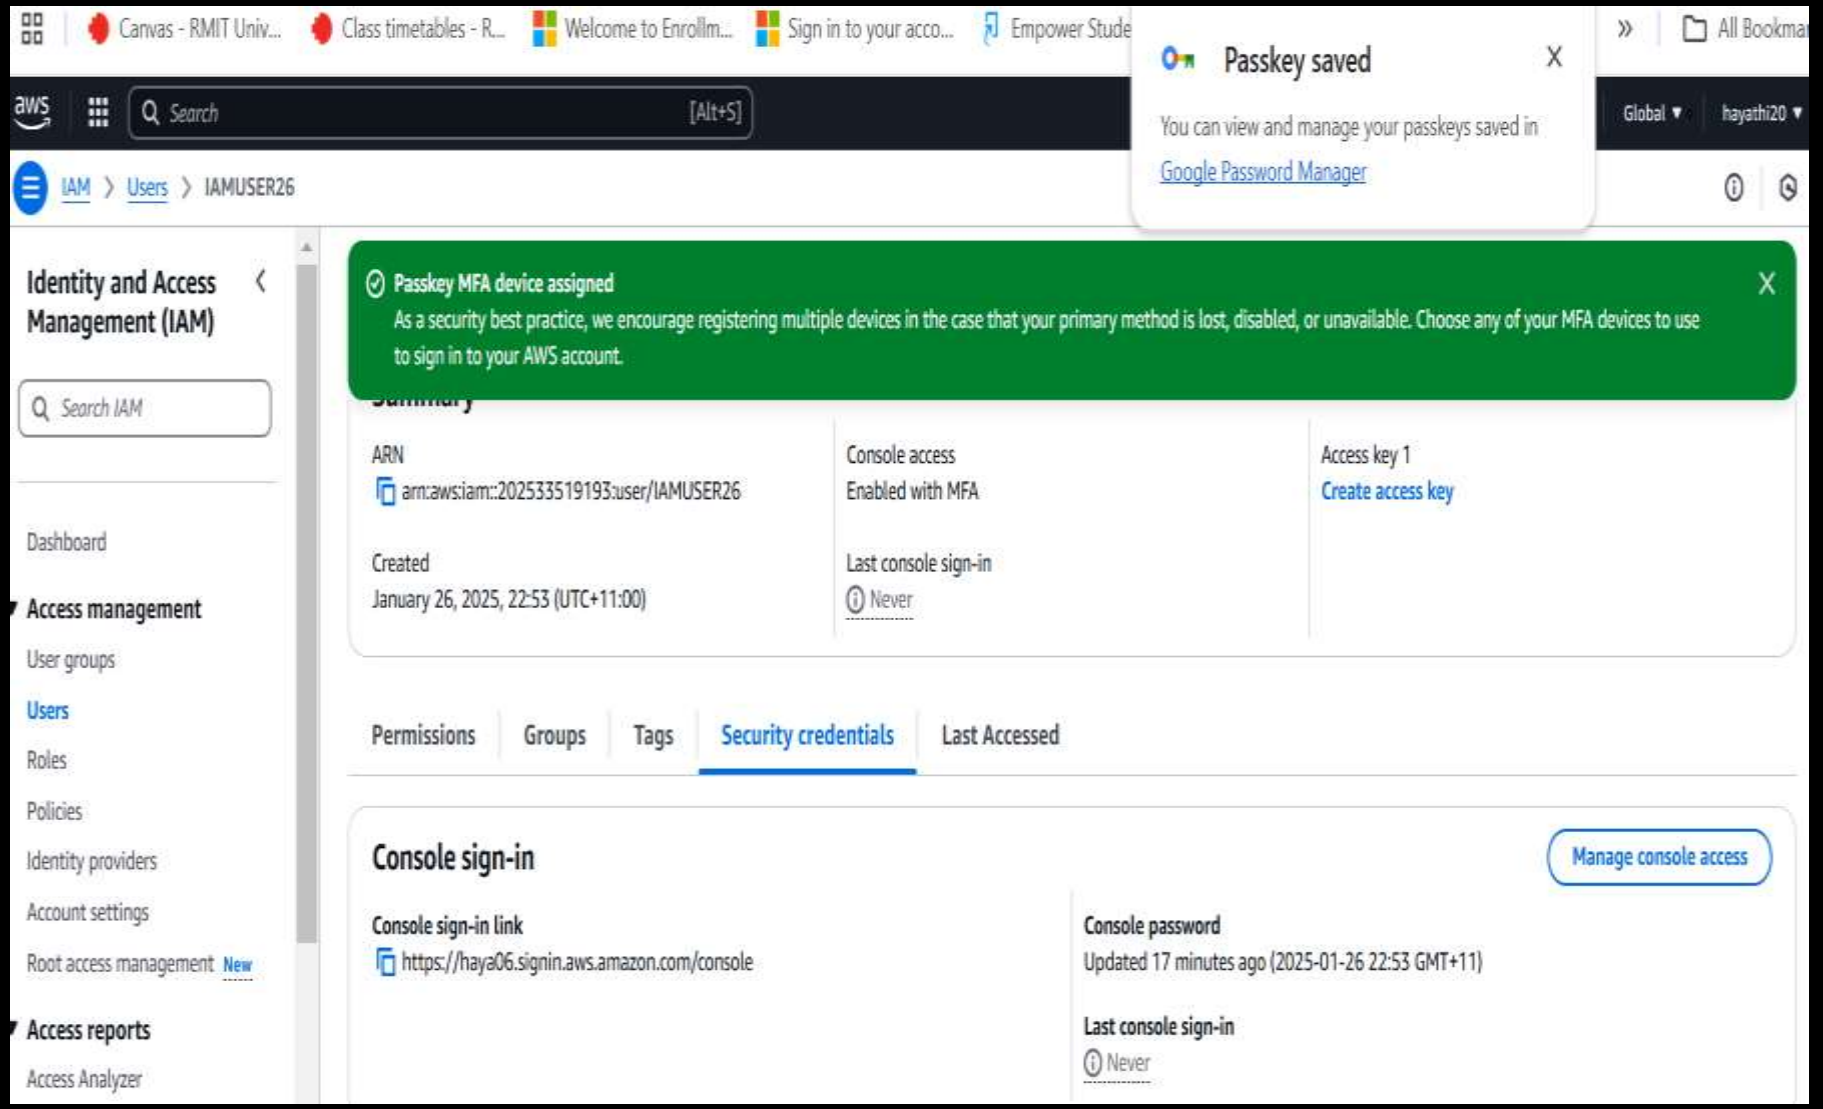

Sign in with Passkey

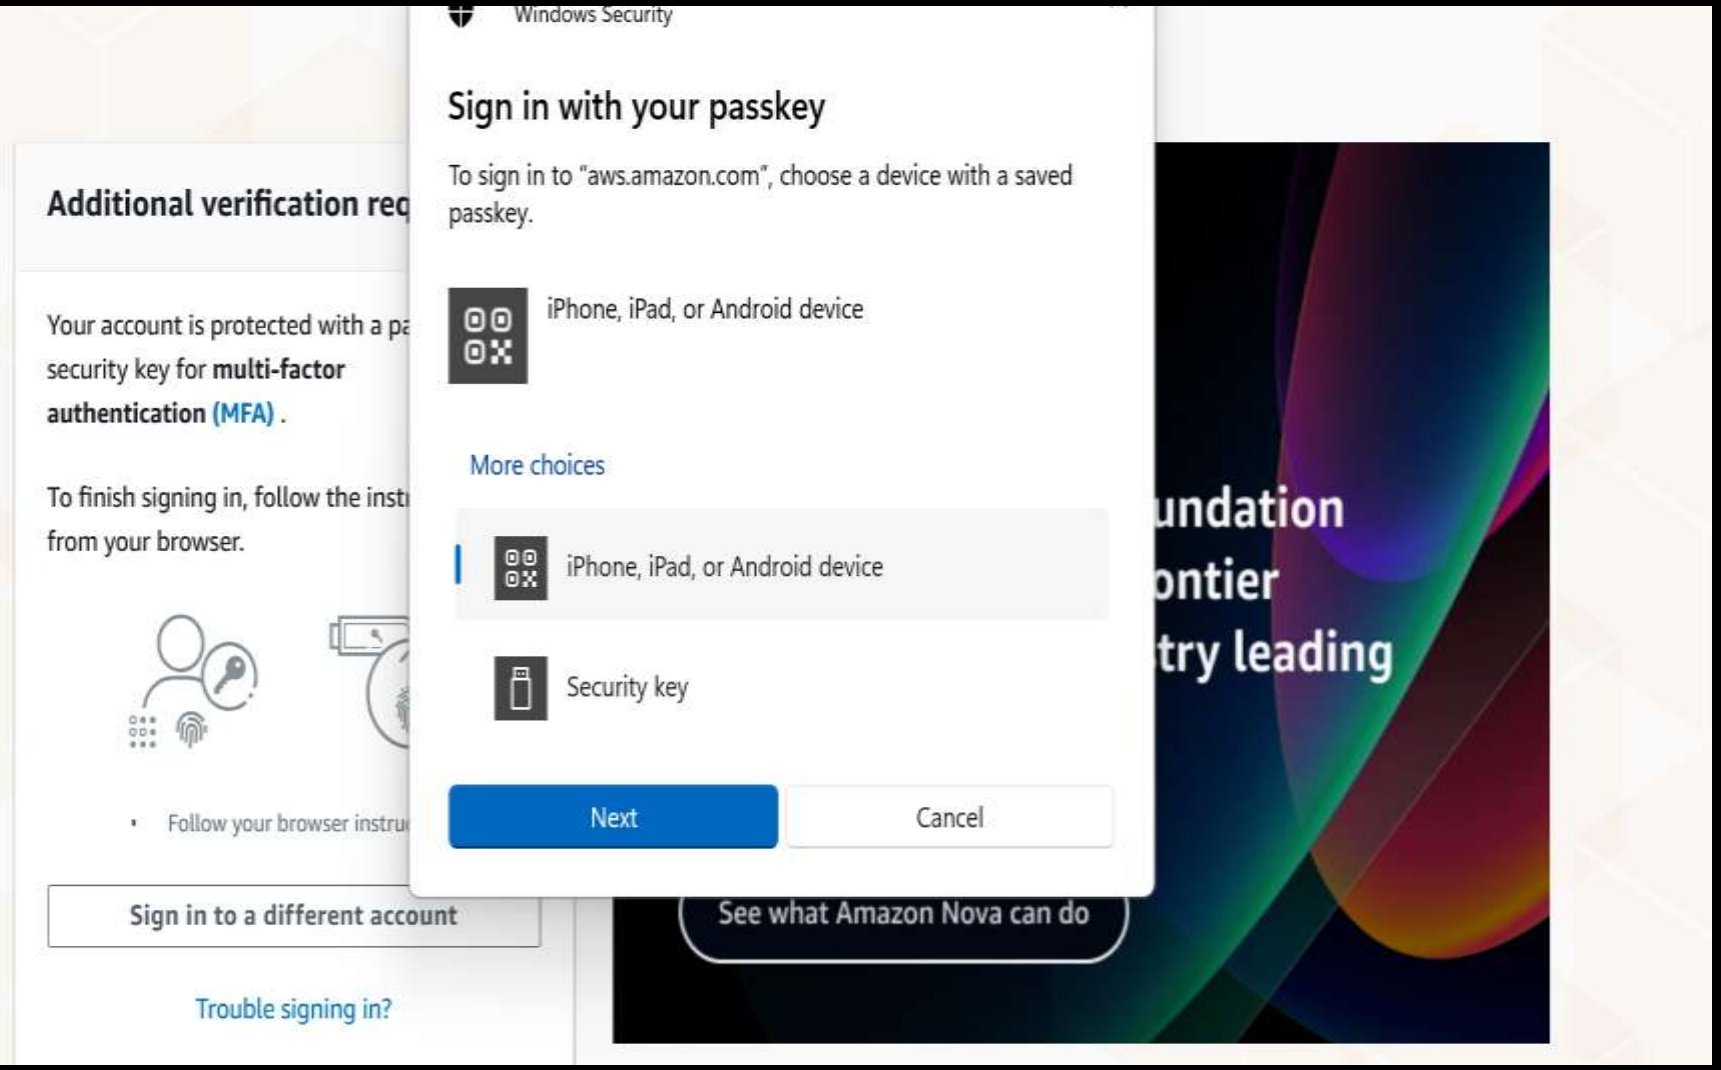

Step 1: Select -> Passkey or security key.

Step 2: Create a 6- digit Recovery PIN

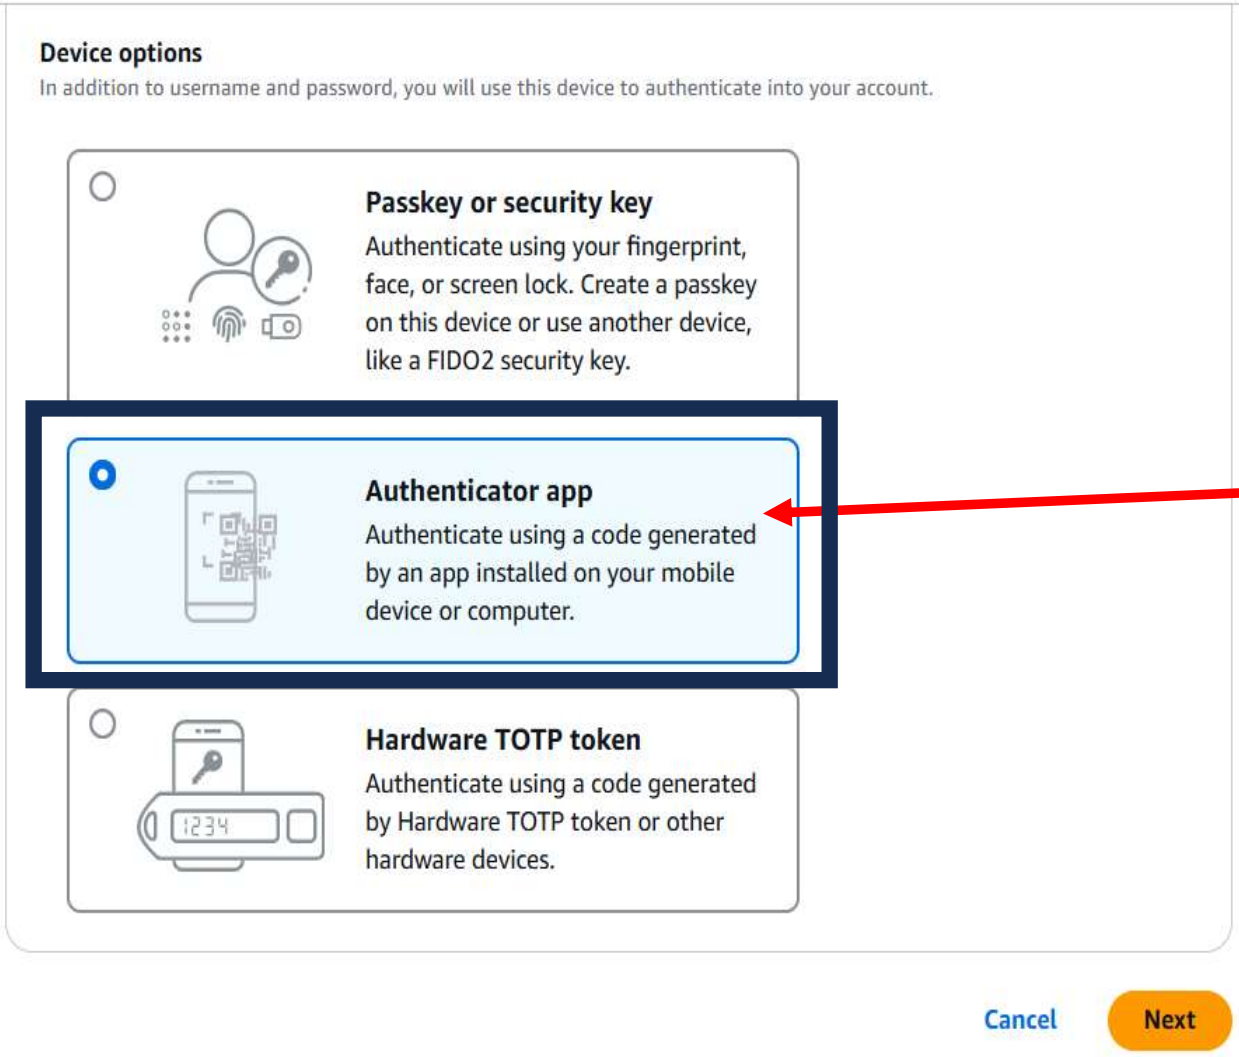

Passkey is assigned

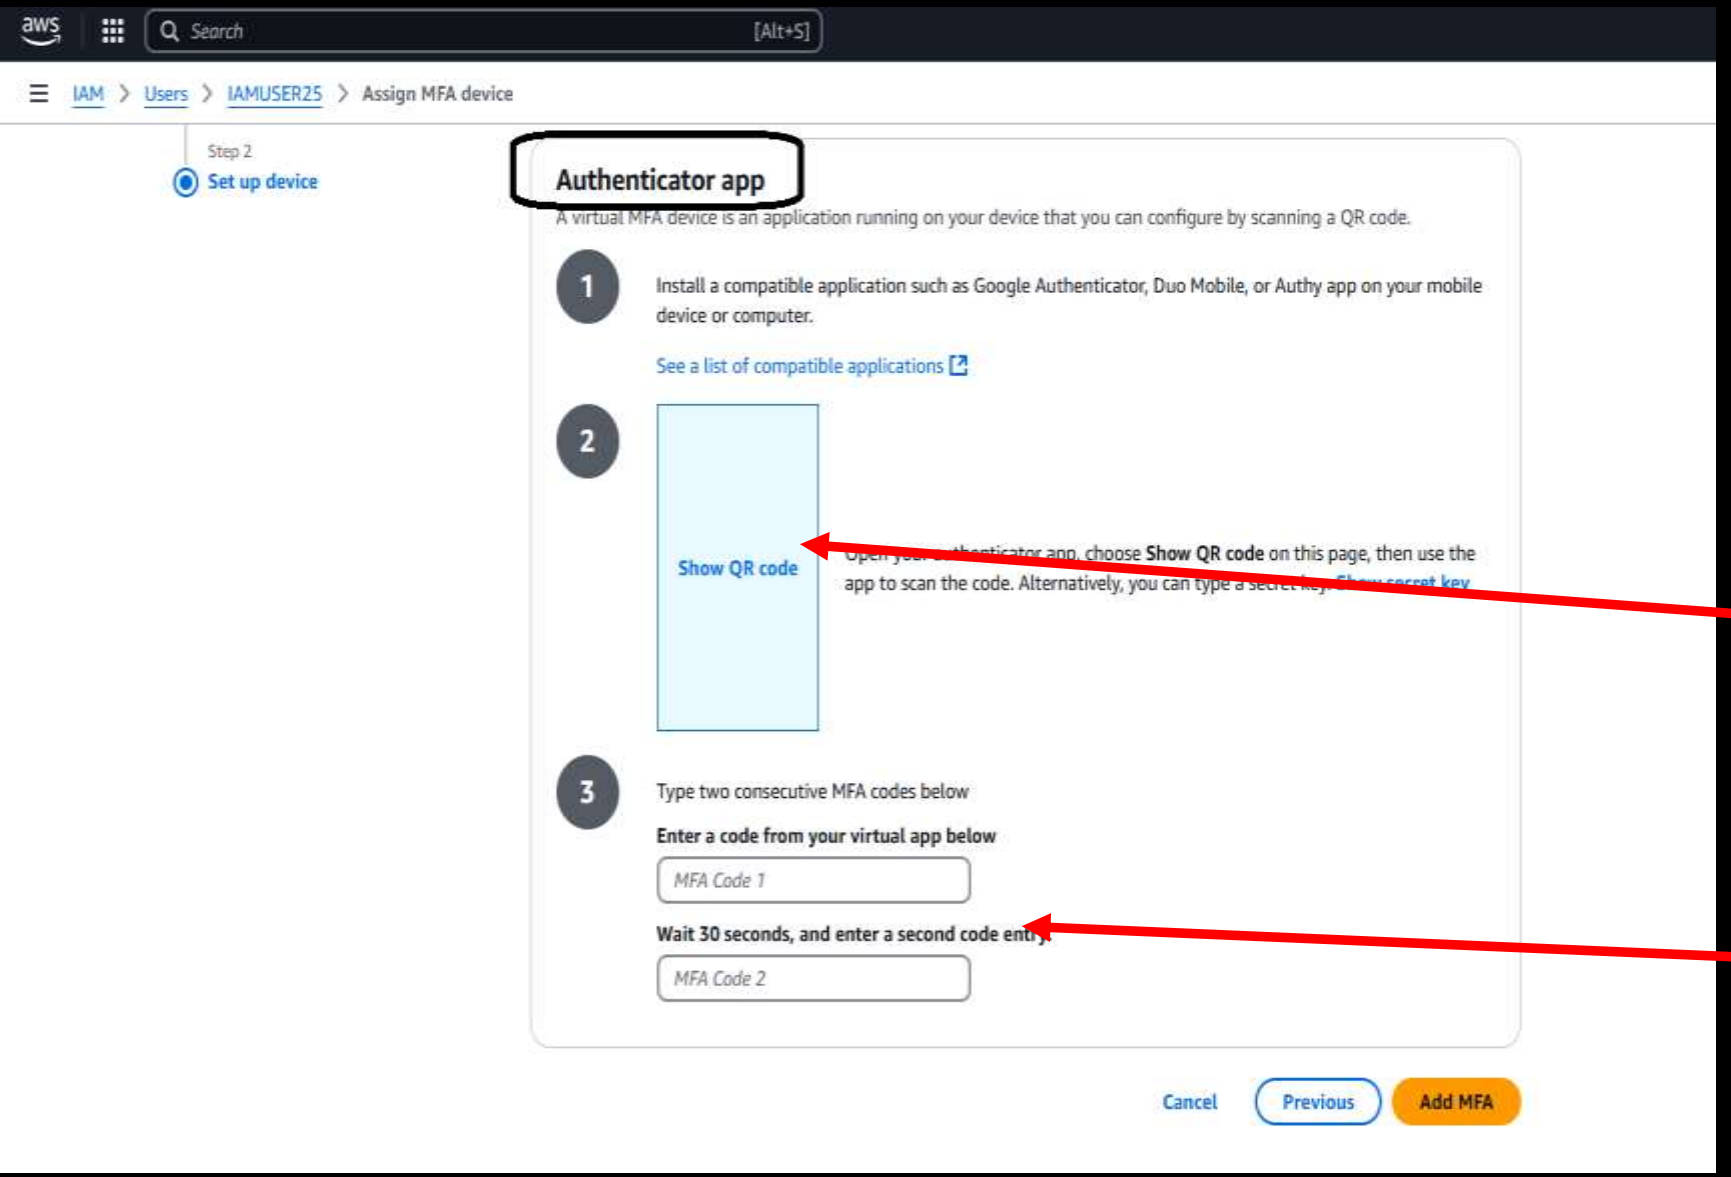

Step 3: Try logging in to your IAM account with the valid credentials and enter the passkey to sign in to your IAM account.

Sign in with the Authenticator App

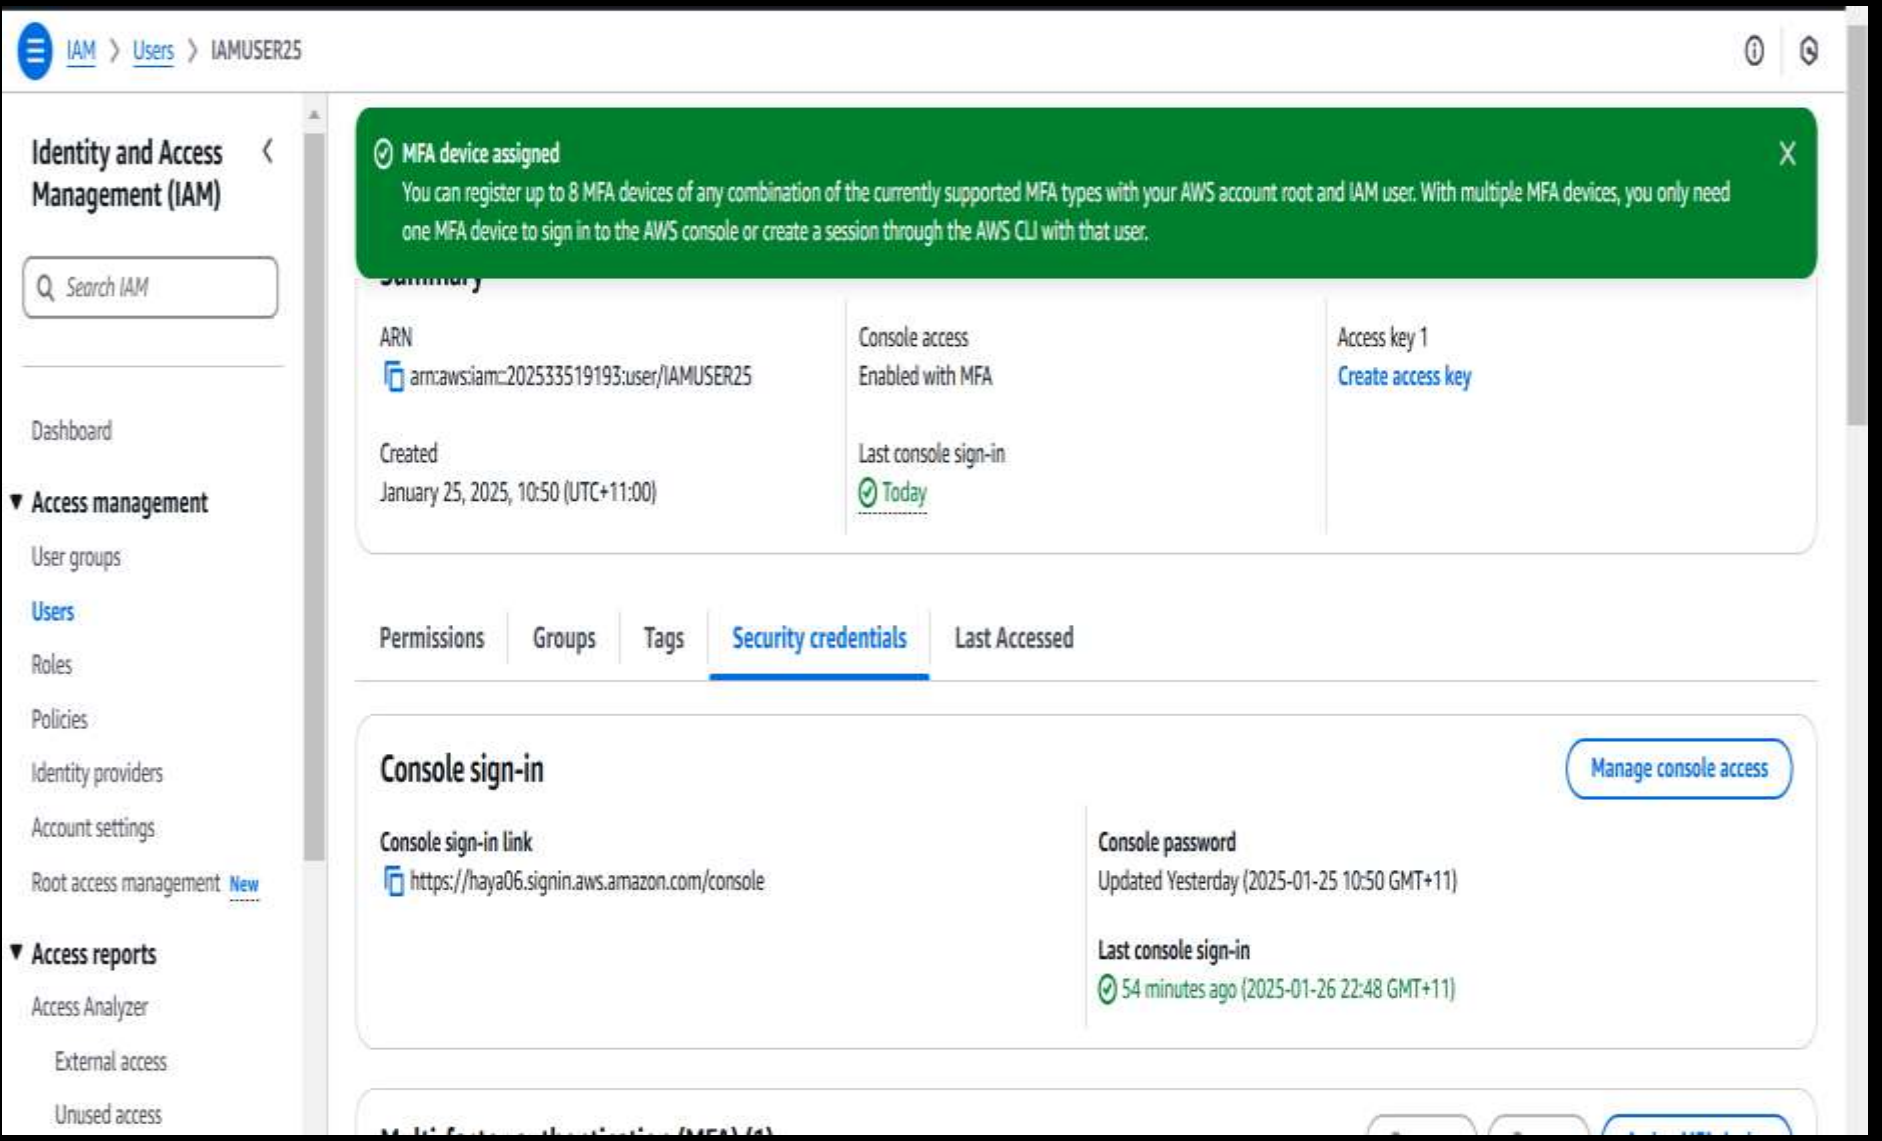

Step 1: Select -> **Authenticator App**

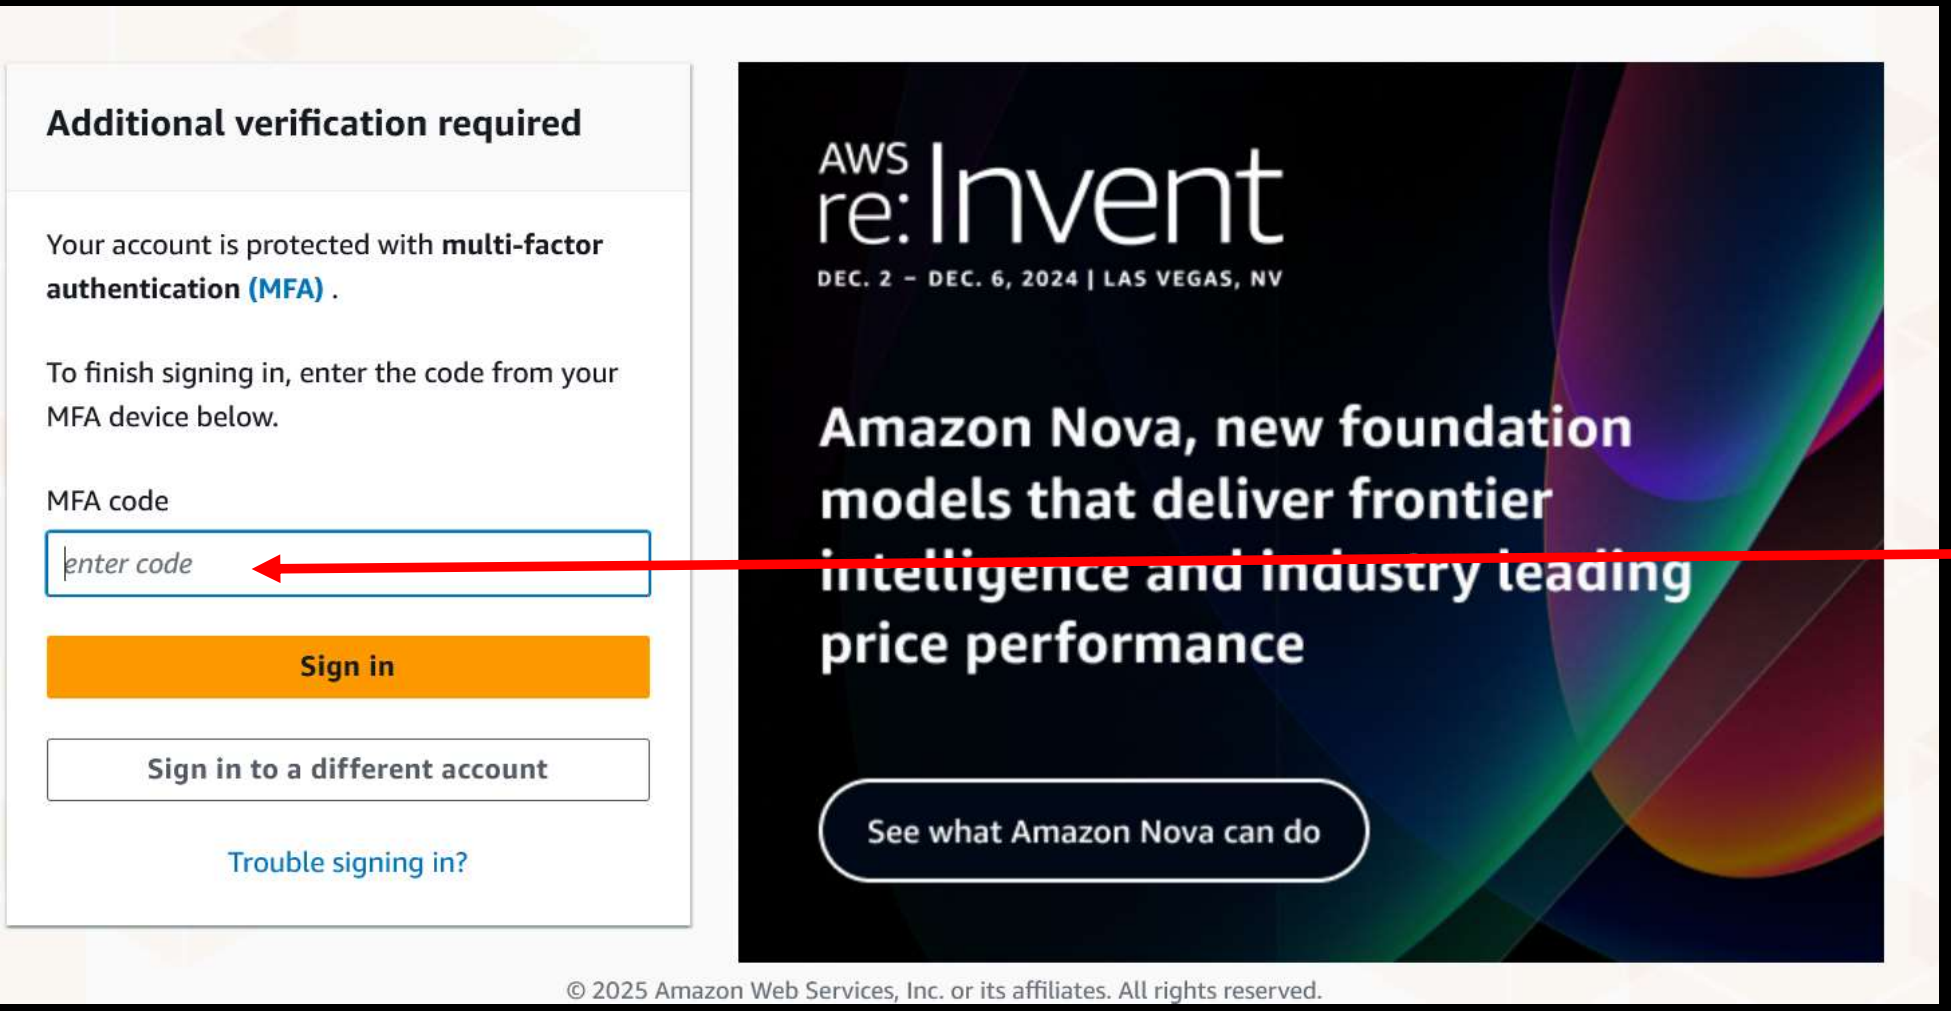

Step 2: Install any **authenticator app** on your mobile device or computer, such as Google Authenticator, Authy app or Duo mobile.

Step 3: Click on the show QR code option, and use the app to scan.

Step 4: Enter the two OTP codes from your authentication app.

Virtual MFA device set-up is done.

Log in to your IAM account with valid credentials, enter the MFA code from the authenticator app, and click sign in.
